The Tinton Falls 9/11 Memorial has acted as a place where residents and visitors can reflect and remember those who were lost. It will remain on the property of Tinton Falls Firehouse, which has served as the Memorial's home since December 14, 2001. The original memorial has weathered and is being refurbished. The renovation includes two matching 15' steel beams that were recovered from the World Trade Center Towers. Donations are still being accepted to fund this memorial renovation. Tinton Falls Fire Company No.1 members are completing the project themselves with donated time and services from local professionals.
